Caterpillar Diesel Power Plants – Using CAT 3516B XQ2000 Diesel Power Modules		
can provide Power Plants in various Sizes ranging from a Single XQ2000 Power Module to Multiple Unit configurations.		
Caterpillar XQ2000 Diesel Power Module, 40' sound attenuated (72dba) container, triple axle chassis. CAT 3516B engine, CAT SR4B generator, premium CAT EMCP floor standing control panel, auto start / stop, engine safeties, CAT auto paralleling switchgear with utility type devices, elec. circuit breaker, CAT electronic load share and speed control governor, 24V starter, 35Amp alternator, jacket water heater, 1250 gallon tank with fuel transfer. Optional electrical step-up transformers (pad mount type) and LV cables available.		

This power plant(s) can also operate in continuous baseload configuration. The CAT Power Module is a completely self-contained electric power generating system, capable of producing power within hours of delivery to your site. Housed in ISO 40' high cube containers for weather protection, durability and sound attenuation, these modules can be mounted on an undercarriage (trailer chassis) for easy transport and flexible operation, or placed on a pad for more permanent installation.

**The Power Plant(s) can also be sold in smaller Sections (Example 2MW, 4MW, 6MW, 12MW, 24MW, etc.).
Please inquire for Details and Pricing. We do have various Alternatives and Options available for
50Hz and 60Hz Applications.**
